

SANUM2024

Stellenbosch, South Africa

3rd to 5th April, 2024

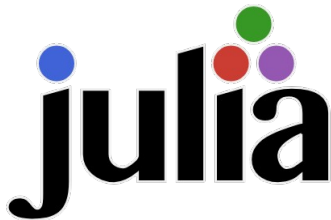

The South African Symposium on Numerical and Applied Mathematics (SANUM) is an annual conference with presentations and posters in various areas of numerical and/or applied mathematics. Registration is now open for the 2024 conference and the organisers invite contributed talks and special sessions.

Plenary speakers:

- David Bindel, Cornell University
- Annie Cuyt, University of Antwerp
- Charis Harley, University of Johannesburg
- Jean Lubuma, University of the Witwatersrand
- Sibusiso Moyo, Stellenbosch University
- Sheehan Olver, Imperial College London

Early bird registration (R1500) closes 15 March 2024

SANUM will also host a 1.5 day pre-conference workshop (02-03 April) on the Julia programming language, with an emphasis on the DifferentialEquations and SciML packages, organised by Sheehan Olver of Imperial College London.

Discounted student registration and some limited travel support is available for students and early-career researchers, courtesy of the DSI-NRF CoE-MaSS.

For more information and registration, visit <http://sanum.github.io/> or contact the organisers at sanumconf@gmail.com.
